

## **King's Ely Year 9 Academic Scholarship**

### **Maths Guidelines**

The Year 9 Maths Scholarship assessment is part of the overall Year 9 Academic Scholarship and is intended to test the pupils on their problem solving ability and creative thinking, as well as their current ability in Maths.

The new GCSE and A Level have been developed to show how the students can tackle questions that they have not seen before as well as standard methods. This assessment is designed with these ideals in mind.
